Vers. 3 April 2024

NOTE: This document is updated on an ongoing basis (see date stamp above)

While not complete, this list will provide a good entry into the primary (journal and book) literature. With a few notable exceptions, chapters in edited volumes are not cited when the volume itself is cited. Some older (pre-2000) species-level taxonomic publications are generally not included unless they have broader biological implications, although important systematic revisions are included. Non-peer-reviewed magazines and government reports are generally not cited, unless the veracity of the data are publically verifiable or especially timely (e.g., the vaquita situation in the Northern Gulf). The Mexican “scientific literature” is high in non-refereed work from various agencies and universities (e.g., SEMARNAT, CONABIO, CICESE, UABC, UABCS) and nonprofit organizations (e.g., CEDO, Pronatura) and this work is generally not cited herein. Some journals are of lower quality and papers from those should be viewed with caution (e.g., *Frontera Norte*, any of the MDPI journals such as *Remote Sensing*). Academic theses and unrefereed abstracts from conference proceedings generally also are not cited (although a few key ones are). Numerous key terrestrial/freshwater/botanical publications are included in this list when they are of interest to coastal investigators (e.g., the Pinacates, the Colorado River Delta, Baja California, coastal desert streams and springs, etc) or deal with Gulf/Baja/Northwest Mexico geological and biogeographical history. Similarly, some important papers on Arizona and California geology, hydrology, etc. are included when they have direct relevance to the Gulf of California, as are some key papers from the Temperate East Pacific that treat the biology of species also occurring in the Sea of Cortez. Coverage of the Pinacate Volcanic Lava Field and its craters is fairly comprehensive. Although some key botanical and anthropological papers and books are cited when they are relevant to the Gulf of California and adjacent coastal regions, the full extent of such publications is not covered.

GULF RESEARCHERS: If you notice an important paper or book that is missing from this list, especially your own, please send it to me and I will add it to the Bibliography ([rbrusca@desertmuseum.org](mailto:rbrusca@desertmuseum.org)). Also, I have PDFs of most of this work and would be happy to share upon a request.
